

Information Commissioner's Office

## Consultation: Age appropriate design code

### Introduction

The Information Commissioner is seeking feedback on her draft code of practice Age appropriate design: a code of practice for online services likely to be accessed by children (the code).

The code will provide guidance on the design standards that the Commissioner will expect providers of online 'Information Society Services' (ISS), which process personal data and are likely to be accessed by children, to meet.

The code is now out for public consultation and will remain open until 31 May 2019. The Information Commissioner welcomes feedback on the specific questions set out below.

For this consultation, we will publish all responses except for those where the respondent indicates that they are an individual acting in a private capacity (e.g. a member of the public or a parent). All responses from organisations and individuals responding in a professional capacity (e.g. academics, child development experts, sole traders, child minders, education professionals) will be published. We will remove email addresses and telephone numbers from these responses but apart from this, we will publish them in full.

For more information about what we do with personal data please see our privacy notice.

Please note, we are using the platform Snap Surveys to gather this information. Any data collected by Snap Surveys for ICO is stored on UK servers. You can read their Privacy Policy [here](#).

## Section 1: Your views on the code

- Q1 Is the 'About this code' section clearly communicated?
- Yes
- No

Q1a If no, then please provide your reasons for this view.

- Q2 Is the 'Services covered by this code' section clearly communicated?
- Yes
- No

Q2a If no, then please provide your reasons for this view.

## Section 2: Your views on the draft standards

There are 16 draft standards in the code. You can comment on all the drafts standards, or focus on a single standard. If you do not want to answer questions on a standard please press skip.

The standards are:

- 1) Best interests of the child
- 2) Age Appropriate Application
- 3) Transparency
- 4) Detrimental use of data
- 5) Policies and community standards
- 6) Default settings
- 7) Data minimisation
- 8) Data sharing
- 9) Geolocation
- 10) Parental Controls
- 11) Profiling
- 12) Nudge techniques
- 13) Connected toys and devices
- 14) Online tools
- 15) Data protection impact assessments
- 16) Governance and accountability

**Best interests of the child:** The best interests of the child should be a primary consideration when you design and develop online services likely to be accessed by a child.

Have we communicated our expectations for this standard clearly?

Q4

Yes

No

If no, then please give reasons for your answer.

Q4a

Do you have any examples that you think could be used to illustrate the approach we are advocating to this standard?

Q5

Yes

No

If yes, then please give reasons for your answer.

Q5a

Do you think this standard gives rise to any unwarranted or unintended consequences?

Q6

Yes

No

If yes, then please give reasons for your answer.

Q6a

Do you envisage any feasibility challenges to online services delivering this standard?

Q7

Yes

No

If yes, then please provide details of what you think the challenges are and how you think they could be overcome?

Q7a

Do you think this standard requires a transition period of any longer than 3 months after the code comes into force?

- Q8  Yes  
 No

If yes, then please provide your reasons for this view, and give an indication of what you think a reasonable transition period would be and why.

Q8a

Do you know of any online resources that you think could be usefully linked to from this section of the code?

- Q9  Yes  
 No

If yes, then please provide details (including links).

Q9a

**Age-appropriate application:** Consider the age range of your audience and the needs of children of different ages. Apply the standards in this code to all users, unless you have robust age-verification mechanisms to distinguish adults from children.

Have we communicated our expectations for this standard clearly?

Q11  Yes

No

If no, then please give reasons for your answer.

Q11a

Do you have any examples that you think could be used to illustrate the approach we are advocating to this standard?

Q12  Yes

No

If yes, then please give reasons for your answer.

Q12a

Do you think this standard gives rise to any unwarranted or unintended consequences?

- Q13  Yes  
 No

If yes, then please give reasons for your answer.

- Q13a Our application is intended for use by older adults and facilitates their accessing community transport in areas that are poorly served by public transport. Many of these users are reluctant to engage with technology and introducing additional requirements on them to verify their age is likely to represent a significant barrier to use of the application. In the process of trying to protect one (very important) sector (i.e. children), there is a significant risk of deterring use of technology that can lead to a significant improvement in the quality of life and wellbeing of another sector (elderly and socially isolated adults). Children are remarkably adept at circumventing checks and controls whereas less technically 'savvy' adults are likely to be deterred by even relatively simple checks.

Do you envisage any feasibility challenges to online services delivering this standard?

- Q14  Yes  
 No

If yes, then please provide details of what you think the challenges are and how you think they could be overcome?

- Q14a With no scheme currently in place that I am aware of to certify which providers can be trusted, third-party age verification technologies may lead to fakes and scams, putting people's personal data at risk. Some larger businesses are likely to seek to offer single-sign-in across a wide variety of online services, which could lead to intrusive commercial tracking of children and adults and potentially devastating personal impacts in the event of a data breach.

Do you think this standard requires a transition period of any longer than 3 months after the code comes into force?

- Q15  Yes  
 No

If yes, then please provide your reasons for this view, and give an indication of what you think a reasonable transition period would be and why.

- Q15a For small organisations, 3 months represents a very short time window within which to understand the requirements, design and implement suitable checks and controls.

Do you know of any online resources that you think could be usefully linked to from this section of the code?

- Q16  Yes  
 No

If yes, then please provide details (including links).

Q16a

**Transparency:** The privacy information you provide to users, and other published terms, policies and community standards, must be concise, prominent and in clear language suited to the age of the child. Provide additional specific 'bite-sized' explanations about how you use personal data at the point that use is activated.
